SRM VALLIAMMAI ENGINEERING COLLEGE

(Autonomous)

Department of English

Process Description Assessment Report

CANDIDATE INFORMATION

Student Name	lux_blackstar31
Department	CSE-2
Quest ID	Quest 56
Completed On	7/11/2026, 9:38:02 pm

PERFORMANCE SUMMARY

Total Questions	5
Rounds Played (incl. retries)	13
Correct Placements	130
Wrong Attempts	156
Final Gems Earned	-26
Total Time	21m 47s
Security Audit	Verified (Clean)

MODEL ANSWERS (PROCESS DESCRIPTIONS)

1. Describe the process of registering for an NPTEL online certification course.

First, the learner visits the official NPTEL website www.nptel.ac.in Next, the learner browses the list of available courses by discipline or by institute. Then, the learner reads the course description, syllabus and duration to check whether the course suits his or her needs. After choosing a course, the learner clicks the 'Enroll' button. Then, the learner logs in with an email ID or a Google account, or creates a new account if necessary. After that, the learner fills in the personal and college details in the registration form. Once the details are saved, the learner is enrolled and gets access to the weekly lectures and assignments. Later, the learner opens the certification exam registration page and selects the preferred exam city. Then, the learner pays the exam fee online through net banking, card or UPI. Finally, the learner receives a confirmation email containing the exam details.

2. Describe the process of reporting a lost mobile phone.

First, the owner calls the lost number to check whether someone answers or the phone is only misplaced. If there is no response, the owner uses a tracking service such as Find My Device or Find My iPhone to locate the phone. Next, if the phone cannot be traced, the owner locks or erases the device remotely to protect personal data. Then, the owner changes the passwords of important accounts such as email, banking and social media. After that, the owner calls the service provider's helpline and blocks the SIM card. Next, the owner visits the nearest police station or the police online portal and files a complaint with the phone's details and IMEI number. Then, the police register the complaint and issue an acknowledgement copy. After that, the owner collects a duplicate SIM from the service provider by showing the complaint copy and an ID proof. Next, the owner blocks the phone's IMEI number on the CEIR portal using the complaint details. Finally, the owner notes the request ID so that the status can be tracked and the phone can be unblocked if it is recovered.

3. Describe the process of organising a successful hackathon.

First, the organisers decide the objective, theme and date of the hackathon. Next, they form committees for registration, technical support, logistics and publicity. Then, they prepare a budget and approach sponsors for funds and prizes. After that, they book the venue and arrange internet, power supply and refreshments. Next, they publicise the event on social media and open online registration for teams. Then, they shortlist the teams and share the problem statements and rules with them. After that, they invite mentors and judges and brief them about the evaluation criteria. On the day of the event, the teams build their prototypes while the mentors guide them. Then, each team presents its project to the judges, who evaluate it on innovation, feasibility and impact. Finally, the winners receive prizes and certificates, and the organisers collect feedback from the participants.

4. Describe the process of applying for an internship.

First, the student identifies the field and the type of internship that match his or her interests and career goals. Next, the student prepares an updated resume that highlights skills, projects and achievements. Then, the student writes a short cover letter that explains why he or she is suited for the role. After that, the student creates or updates a profile on internship portals such as Internshala or LinkedIn. Next, the student searches for suitable openings and checks the eligibility, duration and stipend. Then, the student submits the application online along with the required documents. After that, the company shortlists the candidates and sends the interview or test details by email. Next, the student attends the interview or the screening test. If selected, the student receives an offer letter by email. Finally, the student accepts the offer and reports to the company on the joining date.

5. Describe the process of applying for a PAN card.

First, the applicant visits the official NSDL or UTIITSL website. Next, the applicant selects the online application for a new PAN card (Form 49A for Indian citizens). Then, the applicant chooses the category, such as individual, and fills in details like name, date of birth and address. After that, the applicant enters a mobile number and an email ID for communication. Next, the applicant uploads scanned copies of the proofs of identity, address and date of birth. Then, the applicant reviews all the details and corrects the errors, if any. After that, the applicant pays the application fee through net banking, card or UPI. Once the payment is successful, the system generates an acknowledgement number, which the applicant saves for tracking. Then, the Income Tax Department verifies the details and the documents. Finally, the PAN card is dispatched to the registered address by post, and an e-PAN is sent to the registered email.
